Deutsche Telekom enhances IPTV service

Rapid tv news

German telco Deutsche Telekom has launched a new service for the customers of its IPTV platform Entertain which makes it easier for them to find content they like within the large TV offer. An individual recommendation service proposes movies, ...

Fritz!Box delivers the whole box and dice

The Australian

The one problem was IPTV. Internode's IPTV apparently works without configuration, but you need to manually import a file to have it work with TPG and, I assume, with other ISPs. That's somewhat messy. IPTV should be part of standard configuration ...

Asia-Pacific at the forefront of the IPTV movement

IPTV News

The Asia-Pacific region is in the vanguard of IPTV growth and is swiftly emerging as the second largest IPTV market in the world, according to a new report from RNCOS. The research firm attributes this to several factors, including the robust broadband ...
