MarketWatch (press release)

17, 2012 /PRNewswire via COMTEX/ -- Brazil is undergoing a cultural and economic transformation that will cause mobile penetration to grow from 118 percent in 2011 to 153 percent in 2016 and IPTV services to increase from 21000 subscriptions in 2011 to ...

A smart TV opportunity for telcos

Technology Spectator

A preoccupation with the development of IPTV as a viable non-traditional business opportunity for telecoms and broadband network operators can distract us from the fact that additional avenues are open to telcos seeking a foothold in the pay-TV market. ...
