Cayman Islands to get high-spec IPTV service in Q4

IPTV News

Logic Communications, the main service provider in the Cayman Islands (located in the western Caribbean Sea), has confirmed that it plans to launch IPTV services over a purpose-built fibre optic network in the fourth quarter of this year. Wywy wants to sync social TV, and scores \$3m to do it

GigaOM

But very close synchronization has remained elusive because live TV streams get delivered through a variety of technologies – cable, IPTV, satellite and so on – and they all have different latencies. In other words, even when people are watching live ...
