PwC: 27 percent of Aussies will buy IPTV by 2016

Register

Right now, IPTV is very much in its infancy in Australia, with a number of ISPs and carriers offering services but, in terms of the country's eight million or so households, only moderate adoption. Even so, the PwC entertainment and media outlook study ...

MTS Allstream reports second-quarter 2012 results

mediacaster

Strong revenue growth generated by the Company's wireless, high-speed Internet and IPTV services was offset by planned legacy revenue declines, resulting in ...

Humax YouView DTR-T1000 IPTV Freeview PVR review

Reg Hardware

YouView is the ambitious but agonisingly delayed joint venture from the UK's main broadcasters involved in Freeview along with telcos BT and TalkTalk. As expected from that bunch, it combines a digital terrestrial recorder with internet-TV extras such ...

MarketWatch (press release)

On the heels of our exciting recent announcements about the launching of the first NanoTech branded TV show, "Adam Curry's Big App Show," and the company's expansion into Television, IPTV and Mobile Video, we have had a significant increase in ... Nielsen Study: Smart TVs On The Rise in USA

APP Market

With that in mind, it's no wonder that Internet Protocol TV (IPTV), which allows viewers a direct connection to video that is watchable on the living room TV but ... Time Warner Cable to deploy video gateways, IPTV set-tops

FierceCable

Time Warner Cable didn't name the set-top vendors that will supply it with gateways and IPTV set-tops. The gateway device it described is similar to the X1 gateway manufactured by Pace (LSE: PIC) that Comcast (Nasdaq: CMCSA) has deployed in Boston ... Time Warner Cable moving to all-IP 'over some number of years,' CEO Britt says

FierceIPTV

Britt made the comment in a call with analysts following release of the MSO's second-quarter 2012 earnings. "Whatever the merits of that from an engineering sense, all things IP are the standard that the world is building devices to so that's the ...

IPTV Use on the Rise

ClickZ

The data also showed that the usage of the Internet feature in IPTV-enabled homes has also jumped in the last year. In October 2011, only 2 percent of households had the Internet function enabled through their IPTV. As of February 2012, the number rose ...
