### Spanish pay-TV customers fall to under four million

Rapid tv news

According to CMT's report, cable and IPTV companies have 3.9 million subscribers. Canal+ keeps the lead among the operators. Sogecable's platform dropped 4.5% and currently has 1.7 million customers, but it has increased income 19.5% to €300 million.

### KPN sees strong IPTV growth

DigitalTVEurope.net

Dutch telco KPN added 82,000 IPTV customers in the second quarter, giving it a 24% TV market share, up five percentage points year-on-year but flat quarter-on-quarter thanks to the continued decline of its digital-terrestrial base. KPN now has 1.21 ...

### Consumers are paying for television's new golden age

FierceIPTV

Deliberately or not, MVPDs have focused the latest conversations on broadband speeds and the availability of "content" from the Internet rather than the availability of high quality content available via IPTV, cable and satellite. Partially that is ...
