## Gartner Warns of Slow IPTV Uptake

Sci-Tech Today - USA

... But despite this robust growth, IPTV providers will be forced to undercut the prices of entrenched operators to give consumers an incentive to switch. ...

"While the short- to medium-term profits from IPTV will be modest at best, carriers cannot afford to delay the deployment of the IPTV platform," said Susan Richardson, principal research analyst at Gartner.

"Those who delay too long will risk undermining their ability to be long-term key players in the consumer 'infotainment' communications business.

"This is because IPTV is not a single service; it is a new distribution platform over which many services can eventually be offered. Investments now have to be seen in the context of seeding the ground for the future."
